

UNITED STATES DISTRICT COURT
DISTRICT OF NEVADA

KALSHIEX, LLC,

Plaintiff

v.

KIRK D. HENDRICK, et al.,

Defendants

Case No.: 2:25-cv-00575-APG-BNW

**Order Granting Motion to Dissolve
Preliminary Injunction**

[ECF No. 142]

KalshiEX, LLC is registered with the Commodity Futures Trading Commission (CFTC) as a designated contract market (DCM). Kalshi has established a market for sports betting. Kalshi advertised that it is the “first app for legal sports betting in all 50 states.” But Kalshi is not licensed to conduct gaming in Nevada or any other state. So the Nevada gaming regulators sent it a cease-and-desist letter. Kalshi now contends that it is not taking sports bets and, even if it were, no state can regulate it because it is a DCM under the CFTC’s exclusive jurisdiction. Kalshi relies on a strained reading of the already convoluted Commodities Exchange Act (CEA) in an attempt to evade state regulation. Kalshi’s interpretation would require all sports betting across the country to come within the jurisdiction of the CFTC rather than the states and Indian tribes. That interpretation upsets decades of federalism regarding gaming regulation, is contrary to Congress’ intent behind the CEA, and cannot be sustained.

I. PROCEDURAL POSTURE

In January 2025, Kalshi started listing sports-related event contracts on its exchange. The Nevada Gaming Control Board sent Kalshi a cease-and-desist letter stating that Kalshi was operating an unlicensed sports pool in violation of Nevada gaming law. Kalshi filed this lawsuit against the Board and its members in their official capacities, the Nevada Gaming Commission

1 and its members in their official capacities, and the Nevada Attorney General (collectively, the
2 Board) seeking declaratory and injunctive relief. Kalshi asserted that the CFTC has exclusive
3 jurisdiction over the contracts traded on Kalshi's exchange, so the Board cannot enforce Nevada
4 state law against Kalshi.

5 Kalshi moved for a preliminary injunction to preclude the Board from pursuing Kalshi
6 for civil or criminal penalties under Nevada law based on Kalshi offering sports-related event
7 contracts on its exchange. I granted that motion, concluding that the CFTC had exclusive
8 jurisdiction over contracts listed on a DCM, so Nevada state gaming law was preempted. ECF
9 No. 45.

10 After my preliminary injunction ruling, the District of New Jersey granted Kalshi's
11 motion for an injunction in a similar suit. *KalshiEX LLC v. Flaherty*, No. 25-cv-02152-ESK-
12 MJS, 2025 WL 1218313, at *4-7 (D.N.J. Apr. 28, 2025). The New Jersey state regulatory
13 authorities appealed, and the Third Circuit heard oral arguments on September 10, 2025. Third
14 Cir. Case No. 25-1922. The Third Circuit has yet to issue a decision.

15 Meanwhile, the United States District Court for the District of Maryland denied Kalshi an
16 injunction in similar litigation in that court, ruling that Maryland state gaming authorities were
17 not preempted from regulating Kalshi's sports-related event contracts. *KalshiEX LLC v. Martin*,
18 No. 25-cv-1283-ABA, 2025 WL 2194908, at *1, 5-13 (D. Md. Aug. 1, 2025). Kalshi appealed
19 to the Fourth Circuit, where briefing is ongoing. Fourth Cir. Case No. 25-1892.

20 Then in October 2025, I denied an injunction in a similar case, *North American*
21 *Derivatives Exchange, Inc., d/b/a Crypto.com v. Nevada Gaming Control Board* (the *Crypto*
22 case). In *Crypto*, I ruled that event contracts that turn on the outcomes of sporting events are not
23

1 swaps and thus do not fall within the CFTC’s exclusive jurisdiction. Case No. 2:25-cv-00978-
2 APG-BNW, 2025 WL 2916151, at *11 (D. Nev. Oct. 14, 2025).

3 Within days of my *Crypto* ruling, the Board moved to dissolve the preliminary injunction
4 in this case, asserting that I should reach the same conclusion as I did in *Crypto*. ECF No. 142.
5 Kalshi opposes, arguing that the Board has not set forth an adequate basis to seek dissolution
6 and, in any event, I erred in *Crypto* and so I should not dissolve the injunction. On November
7 14, 2025, I held a hearing in this case jointly with a related case, *Robinhood Derivatives, LLC v.*
8 *Dreitzer*, Case No. 2:25-cv-1541-APG-DJA (the *Robinhood* case). ECF Nos. 219; 220. For the
9 reasons set forth below, I grant the motion to dissolve the preliminary injunction.

10 **II. THE BOARD HAS PRESENTED NEW LAW AND FACTS TO SUPPORT**
11 **CONSIDERING DISSOLUTION.**

12 Kalshi argues that I should not revisit my preliminary injunction ruling because the Board
13 has not identified a significant change in the facts or the law. The Board responds that the
14 District of Maryland’s ruling and my *Crypto* decision are new law. The Board also contends that
15 the subject matter of numerous event contracts Kalshi has offered since I entered my injunction
16 constitute new facts.

17 A party seeking to modify or dissolve an injunction “bears the burden of establishing that
18 a significant change in facts or law warrants revision or dissolution of the injunction.” *Karnoski*
19 *v. Trump*, 926 F.3d 1180, 1198 (9th Cir. 2019) (quotation omitted). Here, the Board identified
20 new law, both in the form of my *Crypto* order and the District of Maryland’s order in *KalshiEX*
21 *LLC v. Martin*. The Board also identified new facts. Since my preliminary injunction order,
22 Kalshi has issued a range of new contracts that potentially are contrary to what Kalshi told me at
23 the preliminary injunction hearing likely would not count as swaps because they have no real-

1 world economic consequence, such as prop bets on things like whether a team will score a
2 touchdown in a certain part of a game or the point total over/under on a game. *See* ECF Nos. 46
3 at 7-8; 143-2 at 5-6. Further, under Federal Rule of Civil Procedure 54(b), I can modify an
4 interlocutory order “at any time” before entry of a final judgment. *Credit Suisse First Bos. Corp.*
5 *v. Grunwald*, 400 F.3d 1119, 1124 (9th Cir. 2005) (quotation omitted).

6 This is a novel and evolving area of the law, and the nuances of the parties’ positions
7 have changed as new arguments, facts, and law develop. My preliminary injunction order was
8 issued very early in this litigation on an accelerated schedule. The law and facts have evolved in
9 this court and others. The circumstances may change yet again when the Third and Fourth
10 Circuits rule on the appeals pending in those courts, or when the Ninth Circuit rules on the
11 inevitable appeal of my rulings in *Crypto*, this case, and *Robinhood*. Additionally, it would be
12 unfair for me to not consider dissolving the injunction given that I denied an injunction under
13 similar circumstances for one of Kalshi’s competitors in *Crypto*. So, I reject Kalshi’s procedural
14 arguments, and I will consider the motion to dissolve the preliminary injunction on the merits.

15 **III. I GRANT THE BOARD’S MOTION TO DISSOLVE THE PRELIMINARY**
16 **INJUNCTION.**

17 The Board argues I should dissolve the injunction because Kalshi’s sports-related event
18 contracts do not fall within the statutory provision Kalshi relies on to invoke the CFTC’s
19 exclusive jurisdiction. The Board also argues that the CFTC’s jurisdiction is not exclusive in any
20 event. Further, the parties dispute whether the balance of hardships and the public interest weigh
21 for or against an injunction.

22 The inquiry into whether to dissolve an injunction is “guided by the same criteria that
23 govern the issuance of a preliminary injunction.” *Karnoski*, 926 F.3d at 1198. To qualify for a

1 preliminary injunction, a plaintiff must demonstrate: (1) a likelihood of success on the merits,
2 (2) a likelihood of irreparable harm, (3) the balance of hardships favors the plaintiff, and (4) an
3 injunction is in the public interest. *Winter v. Natural Res. Def. Council, Inc.*, 555 U.S. 7, 20
4 (2008). Alternatively, under the sliding scale approach, a plaintiff must demonstrate (1) serious
5 questions on the merits, (2) a likelihood of irreparable harm, (3) the balance of hardships tips
6 sharply in the plaintiff's favor, and (4) an injunction is in the public interest. *Alliance for the*
7 *Wild Rockies v. Cottrell*, 632 F.3d 1127, 1135 (9th Cir. 2011). But where a party seeks to
8 dissolve an injunction, "the burden with respect to these criteria is on the party seeking
9 dissolution." *Karnoski*, 926 F.3d at 1198.

10 I dissolve the injunction because the Board has shown that Kalshi is not likely to succeed
11 on the merits, although there are serious questions on the merits. The Board also has shown that
12 the balance of hardships does not tip sharply in Kalshi's favor. Rather, the balance of hardships
13 tips in favor of the Board, and the public interest favors dissolving the injunction.

14 **IV. KALSHI IS NOT LIKELY TO SUCCEED ON THE MERITS, BUT THERE ARE**
15 **SERIOUS QUESTIONS ON THE MERITS.**

16 As I ruled in *Crypto*, event contracts that turn on the outcomes of sporting events are not
17 swaps and thus do not fall within the CFTC's exclusive jurisdiction. 2025 WL 2916151, at *11.
18 I adopt in full my analysis in *Crypto*, so I give only a summary here. In brief, I ruled in *Crypto*
19 that similar event contracts based on the outcome of live events are not "swaps" within the
20 meaning of the Commodity Exchange Act (CEA), and thus do not fall within the CFTC's
21 exclusive jurisdiction in 7 U.S.C. § 2(a). *Id.* at *6-11. First, I have authority to construe the CEA
22 to determine what falls within that jurisdictional provision, such as what constitutes a "swap." *Id.*
23 Second, I interpreted the relevant provision of the CEA's definition of a swap related to event

1 contracts. That provision states that a swap is “any agreement, contract, or transaction . . . that
2 provides for any purchase, sale, payment, or delivery . . . that is dependent on the occurrence,
3 nonoccurrence, or the extent of the occurrence of an event or contingency associated with a
4 potential financial, economic, or commercial consequence.” 7 U.S.C. § 1a(47)(A)(ii). I
5 interpreted the word “occurrence” to mean something happened. *Id.* at 8. I interpreted the word
6 “event” to mean “a happening of some significance that took place or will take place, in a certain
7 location, during a particular interval of time, such as a particular sporting event or an organized
8 activity or celebration for the public or a particular group.” *Id.* I rejected the proposed definition
9 that an “event” can be an “outcome,” and in the specific context of sports, I ruled that the “event”
10 would be “the sporting event itself, not who wins it.” *Id.* (“An ordinary American interpreting the
11 word ‘event’ would conclude that the Kentucky Derby is an event. But who wins the Kentucky
12 Derby is an outcome of that event, not a separate event in and of itself.”).

13 Kalshi raises several arguments as to why I should not evaluate whether Kalshi’s
14 contracts qualify as swaps, why it believes I erred in *Crypto*, and why I should consider other
15 parts of the CEA to conclude that Kalshi’s sports-based event contracts fall within the CFTC’s
16 exclusive jurisdiction. I address each in turn.

17 ***A. The Administrative Procedure Act is not the Board’s only avenue to litigate whether***

18 ***Kalshi’s sports-related event contracts fall within the CFTC’s exclusive jurisdiction.***

19 Kalshi argues that the only mechanism for the Board to challenge the CFTC’s action or
20 inaction in relation to the listing of event contracts on a CFTC-designated exchange like Kalshi’s
21 is through a claim under the Administrative Procedures Act (APA). The Board responds that
22 courts routinely review statutory language to conduct a preemption analysis without requiring
23 that be done through an APA claim. They also argue that an APA claim requires final agency

1 action, and the CFTC has not taken final agency action with respect to the event contracts that
 2 Kalshi and other exchanges have been listing.

3 Under the APA, “[a]gency action made reviewable by statute and final agency action for
 4 which there is no other adequate remedy in a court are subject to judicial review.” 5 U.S.C.
 5 § 704; *Corner Post, Inc. v. Bd. of Governors of Fed. Rsrv. Sys.*, 603 U.S. 799, 808 (2024)
 6 (“Unless another statute makes the agency’s action reviewable . . . , judicial review is available
 7 only for final agency action.” (quotation omitted)); *Prutehi Litekyan: Save Ritidian v. United*
 8 *States Dep’t of Airforce*, 128 F.4th 1089, 1107 (9th Cir. 2025) (stating the APA “limits review to
 9 final agency action” (quotation omitted)). No one has pointed to anything in the CEA that makes
 10 the CFTC’s action or inaction on a listed contract subject to judicial review. And the CFTC has
 11 recently made clear that it has taken no final, definitive position on these contracts. CFTC Letter
 12 No. 25-36 (Sept. 30, 2025). The CFTC indicated that it is aware of the controversy surrounding
 13 these event contracts, including the various related lawsuits. *Id.* at 1-2. In footnote 4 of that
 14 letter, the CFTC stated that it “has not, to date, been requested to take or taken any official action
 15 to approve the listing for trading of sports-related event contracts on any DCM *Id.* at 2 n.4.

16 The CFTC also stated:

17 All sports-related event contracts that are currently listed for trading on DCMs
 18 have been listed pursuant to self-certifications filed by the relevant DCM . . . and
 19 the Commission has not, to date, made a determination regarding whether any
 such contracts involve an activity enumerated or prohibited under . . . 7 U.S.C.
 § 7a-2(c)(5)(C)(i) or Commission regulation 40.11(a), 17 CFR 40.11(a).

20 *Id.* Consequently, there has been no final agency action so the APA provides no avenue for
 21 relief.

22 Nor is the CFTC’s inaction on these contracts a basis to channel a suit solely through the
 23 APA. Where a person sues over an agency’s failure to act, “the APA expressly authorizes a

1 court to ‘compel agency action unlawfully withheld or unreasonably delayed.’” *Plaskett v.*
2 *Wormuth*, 18 F.4th 1072, 1081 (9th Cir. 2021) (quoting 5 U.S.C. § 706(1)). A “claim under
3 § 706(1) can proceed only where a plaintiff asserts that an agency failed to take a discrete agency
4 action that it is required to take.” *Id.* (quoting *Norton v. Southern Utah Wilderness All.*, 542 U.S.
5 55, 63-64 (2004)). But here, the CEA does not require the CFTC to act on self-certifications. *See*
6 7 U.S.C. § 7a-2(c)(1). Rather, the self-certified contracts go forward unless the CFTC acts to
7 prohibit them. *See id.* Alternatively, the registered entity can ask the CFTC for pre-approval or
8 the CFTC can initiate a review. *See id.* §§ 7a-2(c)(5)(B), (c)(5)(C). That is consistent with the
9 CFTC’s letter indicating that it has not acted to approve or disapprove any of the self-certified
10 contracts because nothing in the CEA requires it to do so.

11 Kalshi relies on *Big Lagoon Rancheria v. California* to argue that the Board must file suit
12 under the APA and not “use a collateral proceeding to end-run the procedural requirements
13 governing appeals of administrative decisions.” 789 F.3d 947, 953-54 (9th Cir. 2015) (en banc)
14 (quotation omitted). But in *Big Lagoon*, the federal Bureau of Indian Affairs, had made final
15 decisions to take land into trust for an Indian tribe and to include a tribe on a list of recognized
16 Indian tribes. *Id.* at 950-51. The Ninth Circuit held that challenges to the Bureau of Indian
17 Affairs’ decisions to take land into trust and to recognize an Indian tribe are “garden-variety”
18 APA claims that must be brought under the APA and not as a defense in a separate case. *Id.* at
19 953-54 (quoting *Match-E-Be-Nash-She-Wish Band of Pottawatomi Indians v. Patchak*, 567 U.S.
20 209, 220 (2012)). Here, the CFTC has not made a final decision regarding Kalshi’s listing of
21 sports-related event contracts, nor was it required to do so. Challenging the CFTC’s inaction
22 under these circumstances is not “a garden-variety APA claim.” *Big Lagoon*, 789 F.3d at 953
23

1 (quotation omitted). Therefore, *Big Lagoon* is distinguishable and does not prohibit the Board's
2 action where the relevant federal agency has not and is not required to have taken final action.

3 Further, regardless of whether the CFTC took final action, I disagree that the Board's
4 only route for relief is through the APA. Concluding that a defense to Kalshi's preemption
5 argument must be brought solely through the APA puts the cart before the horse. To decide if
6 something falls within the CFTC's jurisdiction to potentially preempt state law, courts must
7 interpret the CEA because the CEA specifically defines that jurisdiction. Additionally,
8 Congress, through the CEA, defined what is a swap, and nothing in the CEA gives the CFTC the
9 exclusive power to interpret the statutory language defining words like "swap." *See Crypto*, 2025
10 WL 2916151, at *6, 11.

11 Kalshi (and Robinhood in the related case) assert that the CEA expressly delegates to the
12 CFTC the exclusive power to decide whether products listed on a DCM qualify as swaps or other
13 regulated derivatives. They contend the CEA does so through the provisions that delegate to the
14 CFTC the authority to oversee the listing of new contracts, including through the self-
15 certification process. They note that under 7 U.S.C. § 7a-2(c)(5)(B), Congress directed that the
16 CFTC "shall approve a new contract . . . unless the [CFTC] finds that the new contract . . . would
17 violate [the CEA or the CFTC's regulations]." But that speaks to what the CFTC must do, not
18 what a court can or must do. It also refers to the CFTC's "approval" of a contract, not the
19 CFTC's inaction on a self-certification. A registered entity can seek the CFTC's prior approval
20 of a contract, and the CFTC can conduct a post-listing review. *See* 7 U.S.C. §§ 7a-2(c)(4),
21 (c)(5)(C). Thus, § 7a-2(c)(5)(B) provides that if the CFTC reviews a listing, either pre- or post-
22 listing, it must approve the contract unless it finds the listing violates the CEA or CFTC
23 regulations.

1 That does not explicitly confine all statutory interpretations of the CEA’s language,
2 including its definition of a word like “swap,” to the CFTC with no room for court interpretation
3 except through an APA action. For example, if a DCM chose to run on its exchange an auction
4 for real property it had no authority to auction off, no one would conclude that is a swap or a
5 commodity within the CEA’s meaning. Yet according to Kalshi, a DCM could run the auction,
6 hope the CFTC does not notice, and no one else could do anything about it except file an APA
7 suit against the CFTC (not against the DCM) even though an auction of real property plainly
8 does not fall within the CFTC’s exclusive jurisdiction under 7 U.S.C. § 2(a). I disagree. A
9 DCM cannot insulate itself from state regulation through self-certification where its conduct does
10 not fall within the CFTC’s exclusive jurisdiction provision.

11 Kalshi brought this suit to obtain injunctive relief, arguing that state law is preempted.
12 Courts routinely evaluate statutory language to determine whether state law is preempted and the
13 scope of any preemption. *See, e.g., Virginia Uranium, Inc. v. Warren*, 587 U.S. 761, 767 (2019)
14 (examining “arguments about the [Atomic Energy Act’s] preemptive effect much as [the Court]
15 would any other about statutory meaning, looking to the text and context of the law in question
16 and guided by the traditional tools of statutory interpretation”); *Wyeth v. Levine*, 555 U.S. 555,
17 566-81 (2009); *Bates v. Dow Agrosciences LLC*, 544 U.S. 431, 443-44 (2005) (“That [a
18 preemption clause in a federal statute] may pre-empt judge-made rules, as well as statutes and
19 regulations, says nothing about the scope of that pre-emption.”). I therefore reaffirm my position
20 in *Crypto* that in evaluating Kalshi’s preemption arguments and the Board’s defenses against
21 preemption, I can interpret the statutory language to determine what falls within the CFTC’s
22 jurisdiction in the first place.

1 That does not mean, as Robinhood argues in the related case, that the CFTC cannot
 2 regulate the listing of event contracts on DCMs if those contracts do not meet the statutory
 3 definition of the word “swap.” Under 7 U.S.C. § 7(d)(1), to “be designated, and maintain a
 4 designation, as a contract market,” a DCM must comply with the CEA and CFTC regulations.
 5 The CFTC thus can regulate a DCM under § 7(d)(1), even if it does not have exclusive
 6 jurisdiction under § 2(a).

7 ***B. Kalshi is not likely to succeed in showing that its sports-related contracts are swaps.***

8 As relevant here, the CEA defines a “swap” as an “agreement, contract, or transaction . . .
 9 that provides for any purchase, sale, payment, or delivery . . . that is dependent on the
 10 occurrence, nonoccurrence, or the extent of the occurrence of an event or contingency associated
 11 with a potential financial, economic, or commercial consequence.” 7 U.S.C.A. § 1a(47)(A)(ii). I
 12 reaffirm my holding in *Crypto* that the word “event” in this definition means “a happening of
 13 some significance that took place or will take place, in a certain location, during a particular
 14 interval of time, such as a particular sporting event or an organized activity or celebration for the
 15 public or a particular group,” and does not mean an outcome. 2025 WL 2916151, at *8. And I
 16 adopt my preliminary conclusion in *Crypto* that “contingency” means a contingent event. *Id.* at
 17 *8 n.9. And like the contracts in *Crypto*, Kalshi’s event contracts are based on the outcomes of
 18 sporting events or on things that happen during a sporting event. Thus, they are not swaps within
 19 the CEA’s meaning.

20 In my *Crypto* order, I did not address the part of the swap definition that the event or
 21 contingency must be “associated with a potential financial, economic, or commercial
 22 consequence.” *Id.* at *9, n.11. I do so now.

At the November 14, 2025 hearing before me, Kalshi argued that this language means “the event itself has to have potential financial, commercial, or economic consequence. It can’t be an event that makes another financially consequential event more or less likely to occur.” ECF No. 219 at 19. But by Kalshi’s own argument, financial consequences of games based on their impact on downstream externalities like hotel room rentals, food sales, advertising dollars, or the fact that people bet on it cannot suffice because a game only makes room rentals, food sales, advertising, or bets more or less likely to occur. Later in the hearing, Kalshi argued that the potential financial consequences must be “extrinsic to the parties to the contract.” *Id.* at 42. That would include anything imaginable about a potential downstream financial consequence, including that two other people who are not parties to the contract might bet on it.

Just like Kalshi’s interpretation of the other words in the statute, its interpretation of potential financial consequences knows no limiting principle. Congress did not define a swap as a contract on anything that happens or could happen. So interpreting the statutory terms to include everything anyone can conjure up as a subject to bet on, or that might have some conceivable financial consequence if one is creative enough, is not a reasonable interpretation of the statute.

Like the words “event” and “contingency,” I must give these words a reasonable and coherent meaning within the statutory context that does not lead to absurdities. I conclude that the phrase “associated with a potential financial, economic, or commercial consequence” means that the event or contingency is itself inherently joined or connected¹ with a potential financial,

¹ The parties in *Robinhood* agree that “associated with” means joined or connected to, although they dispute what that means in terms of the degree of association between the event or contingency and the financial consequences called for in the statute. *See* 2:25-cv-01541-APG-DJA, ECF Nos. 25 at 9-10; 47 at 4. Kalshi did not specifically define “associated with,” but like

1 economic, or commercial consequence. This means that the event or contingency itself has some
 2 potential financial, economic, or commercial consequence without looking at externalities like
 3 potential downstream financial consequences such as parties extrinsic to the event betting on it.
 4 And it does not include consumer transactions that have not historically been known to be swaps,
 5 such as sports wagers.

6 My interpretation is supported by the surrounding statutory text, legislative context, the
 7 CFTC’s post-enactment guidance, and federalism principles. The other subparts of the “swap”
 8 definition in § 1a(47)(A) refer almost exclusively to financial measures, indices, or instruments.
 9 Subpart (i) refers to a transaction that is “for the purchase or sale, or based on the value, of 1 or
 10 more interest or other rates, currencies, commodities, securities, instruments of indebtedness,
 11 indices, quantitative measures, or other financial or economic interests or property of any kind.”
 12 Subpart (iii) similarly refers to the “exchange . . . of 1 or more payments based on the value or
 13 level of 1 or more interest or other rates, currencies, commodities, securities, instruments of
 14 indebtedness, indices, quantitative measures, or other financial or economic interests or property
 15 of any kind”² The fourth subpart refers to a contract “that is, or in the future becomes,
 16 commonly known to the trade as a swap.” The fifth part refers to a “security-based swap
 17 agreement” that has “a material term . . . based on the price, yield, value, or volatility of any
 18

19 Robinhood, it argues for an expansive understanding of the overall phrase to mean essentially
 any potential financial consequence from the event.

20 ² Subpart (iii) also identifies “commonly known” transactions of this sort, such as interest rate
 21 swaps, foreign exchange swaps, and the like. Admittedly, a few of the specifically identified
 22 swaps in subpart (iii) do not directly reference a financial instrument or measure, such as a
 23 weather swap or an emissions swap. But Congress could have concluded that such swaps are so
 closely related to financial consequences or were already so commonly traded as swaps as to
 include them within the definition. Additionally, weather (and its impacts on agriculture, among
 other things) and emissions are linked to the national interest in a way that the outcome of a
 sporting event or how many points a particular team scores are not.

1 security” Finally, the sixth part covers any contract “that is any combination or
 2 permutation” of contracts in the other five parts. *See also* 17 C.F.R. § 1.3 (defining swap to have
 3 the meaning set forth in the CEA and including “particular products” like cross-currency swaps,
 4 currency options, and foreign exchange rate agreements). Reading subpart (ii) in context of the
 5 surrounding subparts supports the conclusion that “associated with a potential financial,
 6 economic, or commercial consequence” means that the event or contingency must be inherently
 7 associated with a potential financial consequence, not just that the event or contingency may
 8 have some potential downstream financial consequence. *See Yates v. United States*, 574 U.S.
 9 528, 543 (2015) (referring to the principal that “a word is known by the company it keeps . . . to
 10 avoid ascribing to one word a meaning so broad that it is inconsistent with its accompanying
 11 words, thus giving unintended breadth to the Acts of Congress” (simplified); *Beecham v. United*
 12 *States*, 511 U.S. 368, 371 (1994) (“That several items in a list share an attribute counsels in favor
 13 of interpreting the other items as possessing that attribute as well.”). Thus, externalities like
 14 whether people bet on the event or contingency, or whether the event’s occurrence or
 15 nonoccurrence causes downstream financial consequences, are not sufficient.³

16
 17 ³ In litigation between Kalshi and the CFTC, Kalshi distinguished election contracts from those
 18 involving gaming by stating that games and events like horse racing or boxing matches “are
 19 staged purely for entertainment and to facilitate betting. They have no independent significance;
 20 their outcomes carry no economic risks.” *KalshiEX, LLC v CFTC*, ECF No. 17-1 at 40 (D.D.C.
 21 1/25/2024) (the *D.C. Kalshi* case). Kalshi also stated at oral argument in front of the D.C.
 22 district court that a game has “no inherent economic significance. . . . Contracts that involve
 23 games are probably not the type of contracts that we want to be listed on an exchange, because
 they don’t have any real economic value to them. But again, what’s tying that together is the
 existence of the game because the game is the thing that doesn’t have intrinsic economic
 significance.” ECF No. 40 at 15. Kalshi reiterated this position to the D.C. Circuit, arguing that
 “a game doesn’t have economic consequences outside of the game itself.” D.C. Cir. Case No. 24-
 5205, Stay OA Tr. at 63:14-15.

Kalshi also told me at the April 8, 2025 TRO hearing that a coin flip would not be a swap
 because it does “not have independent real-world consequences” and that would not change just
 because people bet on it. ECF No. 46 at 7. Kalshi has changed its tune and now self-certifies to

1 This is consistent with the congressional purposes behind the Dodd-Frank Wall Street
 2 Reform and Consumer Protection Act that added swaps to the CEA. Pub. L. No. 111–203, 124
 3 Stat. 1376 (2010) (“Dodd-Frank”). Dodd-Frank was a “direct and comprehensive response to
 4 the financial crisis that nearly crippled the U.S. economy beginning in 2008.” S. Rep. 111-176, 2,
 5 29-30 (Apr. 30, 2010).⁴ A “major contributor to the financial crisis was the unregulated over-
 6 the-counter (“OTC”) derivatives market” that was “explicitly exempted” from the CFTC’s
 7 jurisdiction and posed a “systemic threat” to the U.S. economy. *Id.* Congress thus aimed Dodd-
 8 Frank at systemic risks in the financial sector that undermined U.S. financial stability, and the
 9 Act’s language should be interpreted through that lens.

10 This view is further supported by the CFTC’s rulemaking after Congress added swaps to
 11 the CEA. The CFTC determined that certain consumer agreements, contracts, and transactions
 12 would not be considered swaps “when entered into by consumers . . . primarily for personal,
 13 family, or household purposes.”⁵ *Further Definition of “Swap,” “Security-Based Swap,” and*
 14 *“Security-Based Swap Agreement”; Mixed Swaps; Security-Based Swap Agreement*
 15 *Recordkeeping*, 77 Fed. Reg. 48208-01, 48246, 2012 WL 3257776 (Aug. 13, 2012). The CFTC
 16 stated that in determining whether consumer transactions are swaps, it would consider factors
 17 such as whether the contracts at issue (1) “do not contain payment obligations, whether or not
 18 contingent, that are severable from the agreement, contract, or transaction”; (2) “are not traded

19 _____
 20 the CFTC that not only a game but things that happen during a game have potential financial
 consequences. *See, e.g.*, ECF No. 152-8 at 2, 14.

21 ⁴ Dodd-Frank is another name for The Restoring American Financial Stability Act of 2010. *See*
Laborers’ Loc. v. Intersil, 868 F. Supp. 2d 838, 848 (N.D. Cal. 2012).

22 ⁵ The CFTC did not specifically identify sports wagers as consumer contracts that are not swaps,
 23 but that may be explained by the fact that the CFTC had already issued its regulation at 17
 C.F.R. § 40.11(a) that prohibits DCMs from listing contracts involving gaming. *See Provisions*
Common to Registered Entities, 76 FR 44776-01, 44785, 2011 WL 3099850 (July 27, 2011).

1 on an organized market or over-the-counter”; and (3) “[i]nvolve an asset of which the consumer
2 is the owner or beneficiary, or that the consumer is purchasing, or they involve a service
3 provided, or to be provided, by or to the consumer.” *Id.* at 48247. Sports wagers do not contain
4 payment obligations that are severable from the contract itself. They are not (until Kalshi and
5 other DCMs started offering them) traded on organized markets. They involve a service
6 provided to the consumer as entertainment. And sports wagers have not historically been
7 considered swaps. *See id.* at 48248 (stating that the CFTC and SEC “do not intend to suggest that
8 many types of consumer and commercial arrangements that historically have not been considered
9 swaps are within the swap or security-based swap definitions.”).

10 During the November 14, 2025 hearing, Kalshi stated that the CFTC has expressed that
11 there are “some customary consumer transactions that you would expect to happen off
12 exchange.” ECF No. 219 at 35. I agree that sports bets are in that category. Kalshi characterizes
13 its sports-related event contracts in various ways, but at bottom, they are sports wagers. As
14 Justice Potter Stewart famously said about pornography in his concurrence in *Jacobellis v. State*
15 *of Ohio*, “I know it when I see it.” 378 U.S. 184, 197 (1964). These are sports wagers and
16 everyone who sees them knows it. That includes Kalshi, who has advertised itself as the “first
17 app for legal sports betting in all 50 states.” *See Martin*, Case No. 1:25-cv-01283-ABA, ECF No.
18 28-2 at 3.⁶ Kalshi has not disputed that is how it advertised itself, nor has it successfully
19 distinguished its arguments here from its own plain words.

20 Finally, my interpretations comport with the traditional balance between state and federal
21 regulation of gaming. In contrast, Kalshi’s proposed reading upends that regime with no
22

23 ⁶ I can consider the exhibits in the *Martin* case because I can consider hearsay “in deciding whether to issue a preliminary injunction” or TRO. *Johnson v. Couturier*, 572 F.3d 1067, 1083 (9th Cir. 2009).

1 expressed congressional intent to do so, with no federal gaming regulator to replace the states’
2 regulatory infrastructures, and contrary to the expressed congressional intent that CFTC
3 exchanges should not become sports gambling venues. *See Crypto*, 2025 WL 2916151, at *6. I
4 noted in my *Crypto* order that the broad interpretation of swaps that Crypto (and Kalshi and
5 Robinhood) are promoting “would sweep nearly all sports wagering into the CFTC’s exclusive
6 jurisdiction even though the states historically have regulated gambling through their police
7 power.” *Id.* at *9. That is so because “nearly every sports bet would be a transaction in which
8 payment is dependent on the outcome of a sporting event and is associated with a potential
9 financial, economic, or commercial consequence.” *Id.* (footnote omitted). That “cannot be a
10 proper reading of the statute because that would mean that all sports wagering must be done on a
11 DCM, and not at casinos, as the CEA forbids nearly all swap dealing and trading unless done on
12 a DCM, except for certain market participants, none of whom are casinos or the average sports
13 bettor.” *Id.* (footnote omitted). As I stated in *Crypto*, “[h]ad Congress intended such a sea
14 change in the regulatory landscape, it surely would have said so. The CEA’s language and
15 legislative history show that Congress did not intend such a change and, to the contrary, did not
16 want gambling to take place on CFTC-designated exchanges.” 2025 WL 2916151, at *10
17 (simplified).

18 Kalshi argues that wagers at sportsbooks are not swaps falling within the CFTC’s
19 jurisdiction because the CEA covers products traded on an exchange, and “once a gambler places
20 a bet with a sportsbook in Nevada, neither the gambler nor the sportsbook can sell that bet to
21 anyone else on any organized exchange.” ECF No. 184 at 17. I have no evidence before me that
22 sports wagers are not tradeable. But even if they are not, being tradeable is not included in the
23 CEA’s definition of a swap. Instead, the CEA defines a swap and states that if something is a

1 swap, it must be traded on an exchange. *See* 7 U.S.C. §§ 1a(47) (defining swap); 2(e) (making it
2 “unlawful for any person, other than an eligible contract participant, to enter into a swap unless
3 the swap is entered into on, or subject to the rules of, a board of trade designated as a contract
4 market under section 7 of this title”). And while the CFTC has stated that it will consider
5 whether an instrument is traded on an exchange as a factor to distinguish consumer contracts
6 from swaps, it is not the only factor the CFTC identified. *Further Definition of “Swap,”*
7 *“Security-Based Swap,” and “Security-Based Swap Agreement”*; *Mixed Swaps*; *Security-Based*
8 *Swap Agreement Recordkeeping*, 77 FR 48208-01, 48247 (Aug. 13, 2012). Further, Kalshi’s
9 proposed distinction becomes self-fulfilling, circular, and inconsistent with the statutory text.
10 Kalshi essentially argues that if contracts are not traded on an exchange, then they are not swaps
11 that must be traded on an exchange. But the CEA states that all swaps must be traded on an
12 exchange. Additionally, the CFTC has prohibited DCMs from listing contracts that involve
13 gaming. 17 C.F.R. § 40.11(a)(1). By Kalshi’s logic, Kalshi’s gaming contracts should not count
14 as swaps because the CFTC prohibited them from being traded on an exchange.

15 The Board thus has met its burden to show that Kalshi is not likely to succeed in showing
16 that Kalshi’s sports-related contracts are swaps because those contracts are based on the outcome
17 of sports events or are based on things that take place during an event (such as a coin flip) but
18 that are not events or contingencies themselves within the CEA’s meaning. Additionally,
19 although a sports game might be inherently associated with a potential financial consequence
20 (people pay to attend), discrete moments or acts during a sports game like a coin flip or whether
21 there is a fumble are not inherently associated with potential financial, economic, or commercial
22 consequences within the CEA’s meaning.

1 Although Kalshi critiques my interpretations, Kalshi’s proposed reading is worse because
2 it has no limiting principle, has similar semantic and superfluity problems it identifies in my
3 interpretation, and goes against congressional intent. Kalshi argues that Congress defined
4 “swap” broadly, but a “statute’s meaning does not always turn solely on the broadest imaginable
5 definitions of its component words.” *Epic Systems Corp. v. Lewis*, 584 U. S. 497, 523 (2018)
6 (simplified). In interpreting the statute, I must construe the words in context and avoid
7 absurdities. *Marinello v. United States*, 584 U. S. 1, 7-8 (2018); *Arizona State Bd. For Charter*
8 *Sch. v. U.S. Dep’t of Educ.*, 464 F.3d 1003, 1008 (9th Cir. 2006). Perhaps here, like the cases
9 Justice Stewart mentions in *Jacobellis*, I am “faced with the task of trying to define what may be
10 indefinable.” 378 U.S. at 197. But if everything a person can conceive of happening is an event
11 or contingency, and if every downstream economic consequence someone can conjure up makes
12 that event or contingency associated with a potential financial, commercial, or economic
13 consequence, the words lose all meaning or render superfluous the rest of the swap definition.
14 See *United States v. Lopez*, 514 U.S. 549, 565 (1995) (rejecting a “rationale [that] lacks any real
15 limits because, depending on the level of generality, any activity can be looked upon as
16 commercial”).

17 Kalshi’s position also does not comport with what Congress was trying to achieve when
18 it added swaps to the CEA. Congress was bringing risky financial products out of the shadows
19 that had threatened the stability of the entire U.S. financial sector, and which had catastrophic
20 ripple effects on the U.S. and world economies during the financial crisis of 2007-2008.
21 Congress was not enabling nationwide gambling on CFTC-designated exchanges.
22 “[I]nterpretations of a statute which would produce absurd results are to be avoided if alternative
23 interpretations consistent with the legislative purpose are available.” *Griffin v. Oceanic*

1 *Contractors, Inc.*, 458 U.S. 564, 575 (1982). It is absurd to think that Congress intended for
 2 DCMs to turn into nationwide gambling venues on every topic under the sun to the exclusion of
 3 state regulation and with no comparable federal regulator⁷ without ever mentioning that was the
 4 goal when Congress added swaps to the CEA in 2010.

5 ***C. Kalshi has not shown a likelihood of success that excluded commodities fall within***
 6 ***the CFTC’s exclusive jurisdiction under § 2(a).***

7 Kalshi argues that even if its contracts are not swaps, they are “excluded commodities”
 8 subject to the CFTC’s regulation.⁸ The Board responds that excluded commodities also require
 9

10 ⁷ The CFTC has stated that “in the United States, gambling is overseen by state regulators with
 11 particular expertise, and governed by state gaming laws aimed at addressing particular risks and
 12 concerns associated with gambling. **The Commission is not a gaming regulator.** The CEA
 13 and Commission regulations are focused on regulating financial instruments and markets, and do
 14 not include provisions aimed at protecting against gambling-specific risks and concerns,
 15 including customer protection concerns inherent to gambling. **Permitting event contracts**
 16 **involving gaming, as proposed to be defined, to trade on CFTC-regulated markets would in**
 17 **effect permit instruments commonly understood as bets or wagers on contests or games to**
 18 **avoid these legal regimes and protections.** Gambling is a rapidly evolving field, and the
 19 Commission does not believe that it has the statutory mandate nor specialized experience
 20 appropriate to oversee it, or that Congress intended for the Commission to exercise its
 21 jurisdiction or expend its resources in this manner.” *Event Contracts*, 89 FR 48968-01, 48982-83
 (June 10, 2024) (internal footnotes omitted, emphasis added). Although the CFTC made this
 statement in the context of a proposed rule that was never finalized, the CFTC’s statements
 express its view on its own expertise (or lack thereof) in this area. The importance of strict
 gaming regulation has been highlighted by the recent arrests of high-profile players and coaches
 related to illegal gambling allegations in professional baseball and basketball. *See Two Current*
Major League Baseball Players Charged in Sports Betting and Money Laundering Conspiracy,
[https://www.justice.gov/usao-edny/pr/two-current-major-league-baseball-players-charged-sports-](https://www.justice.gov/usao-edny/pr/two-current-major-league-baseball-players-charged-sports-betting-and-money-laundering)
[betting-and-money-laundering](https://www.justice.gov/usao-edny/pr/two-current-major-league-baseball-players-charged-sports-betting-and-money-laundering); *31 Defendants, Including Members and Associates of Organized*
Crime Families and National Basketball Association Coach Chauncey Billups, Charged in
Schemes to Rig Illegal Poker Games, [https://www.justice.gov/usao-edny/pr/31-defendants-](https://www.justice.gov/usao-edny/pr/31-defendants-including-members-and-associates-organized-crime-families-and-national)
[including-members-and-associates-organized-crime-families-and-national](https://www.justice.gov/usao-edny/pr/31-defendants-including-members-and-associates-organized-crime-families-and-national).

22 ⁸ Kalshi also asserts, without elaboration, that its contracts are “futures” or “options.” ECF No.
 23 184 at 14. Section 2(a) does not use the word “futures” standing alone. Rather, it refers to
 “contracts of sale of a commodity for future delivery.” Kalshi does not analyze how its contracts
 fit this statutory language. As for options, the Ninth Circuit has indicated that “an option means
 the contract whereby the creator (or writer) of the option grants to the purchaser ‘the right, for a
 specified period of time, to either buy or sell the subject of the option at a predetermined price.’”

1 an associated financial consequence and, in any event, excluded commodities do not fall within
 2 the statutory provision that Kalshi asserts gives the CFTC exclusive jurisdiction, 7 U.S.C.
 3 § 2(a)(1)(A).

4 Section 2(a)(1)(A) states that the CFTC:

5 shall have exclusive jurisdiction . . . with respect to accounts, agreements . . . , and
 6 transactions involving swaps or contracts of sale of a commodity for future
 7 delivery . . . , traded or executed on a contract market designated pursuant to
 8 section 7 of this title or a swap execution facility pursuant to section 7b-3 of this
 9 title or any other board of trade, exchange, or market, and transactions subject to
 10 regulation by the Commission pursuant to section 23 of this title.

11 Section 1a(9) defines a commodity to mean various products like wheat, cotton, and rice,
 12 “all other goods and articles” (with some exceptions not relevant here), and “all services, rights,
 13 and interests . . . in which contracts for future delivery are presently or in the future dealt in.”

14 The CEA separately defines an excluded commodity to mean:

- 15 (i) an interest rate, exchange rate, currency, security, security index, credit risk or
 16 measure, debt or equity instrument, index or measure of inflation, or other
 17 macroeconomic index or measure;
- 18 (ii) any other rate, differential, index, or measure of economic or commercial risk,
 19 return, or value that is--
 - 20 (I) not based in substantial part on the value of a narrow group of
 commodities not described in clause (i); or
 - 21 (II) based solely on one or more commodities that have no cash market;
 - 22 (iii) any economic or commercial index based on prices, rates, values, or levels
 that are not within the control of any party to the relevant contract, agreement, or
 transaction; or
 - 23 (iv) an occurrence, extent of an occurrence, or contingency (other than a change
 in the price, rate, value, or level of a commodity not described in clause (i)) that
 is--
 - (I) beyond the control of the parties to the relevant contract, agreement, or
 transaction; and
 - (II) associated with a financial, commercial, or economic consequence.

23 *Commodity Futures Trading Comm’n v. White Pine Tr. Corp.*, 574 F.3d 1219, 1226 (9th Cir.
 2009) (quoting 1 Derivatives Regulation § 1.02[10]). Kalshi does not explain how its contracts
 fit this definition either.

1 7 U.S.C. § 1a(19).⁹

2 First, the relevant portion of the excluded commodity definition requires the “occurrence,
3 extent of an occurrence, or contingency” to be “associated with a financial, commercial, or
4 economic consequence.” Thus, an event contract that does not satisfy the swap definition’s
5 requirement for a potential financial consequence also does not fit within the excluded
6 commodity definition. The CFTC has often referred to excluded commodities as intangible
7 financial commodities, thus suggesting that the CFTC also reads the phrase “associated with” to
8 require the event or contingency to inherently have a financial consequence.¹⁰ Kalshi argues that
9

10 ⁹ Kalshi and Robinhood note that the word “event” does not appear in the definition of an
11 excluded commodity. But the word “event” also does not appear in the special rule for public
12 interest review in 7 U.S.C. § 7a-2(c)(5)(C)(i). The special rule is not limited to swaps because it
13 also refers to contracts, agreements, and transactions. And in the special rule, although the word
14 “swaps” appears in the opening clause along with agreements, contracts, and transactions, it is
15 dropped in the clause that states that the CFTC may determine that such “agreements, contracts,
16 or transactions are contrary to the public interest if the agreements, contracts, or transactions
involve” one of the enumerated subjects. No one has suggested that the CFTC cannot conduct a
public interest review of swaps under the special rule even though the word was omitted in the
phrase giving the CFTC the authority to conduct the public interest review. And unlike the swap
definition, the excluded commodity definition does not include the word “potential” in relation to
the financial consequence. All this shows is that the CEA has some drafting peculiarities that
courts must interpret as best they can.

17 ¹⁰ See, e.g., *Position Limits for Derivatives*, 78 FR 75680-01, 75749 (Dec. 12, 2013) (“Initially,
18 the Commission limited its approval of position accountability to financial instruments (i.e.,
19 excluded commodities) that had a high degree of liquidity.”); *id.* at 75762, n.730 (stating that the
20 excluded commodity definition “includes financial products such as interest rates, exchange
21 rates, currencies, securities, credit risks, and debt instruments as well as financial events or
22 occurrences”); *Position Limits for Derivatives*, 81 FR 96704-01, 96742 (Dec. 30, 2016) (“In
23 1987, the Commission provided interpretive guidance regarding the bona fide hedging definition
and risk management exemptions for futures in financial instruments (now termed excluded
commodities).”); *Effective Date for Swap Regulation*, 76 FR 42508-01, 42511, n.27 (July 19,
2011) (“The term ‘excluded commodity’ is defined . . . to include, among other things, financial
instruments such as a currency, interest rate, or exchange rate, or any economic or commercial
index based on prices, rates, values, or levels that are not within the control of any party to the
transaction.”); *Effective Date for Swap Regulation*, 76 FR 65999-01, 66000 (Oct. 25, 2011)
(referring to excluded commodities as “generally, financial, energy and metals commodities”);
Significant Price Discovery Contracts on Exempt Commercial Markets, 73 FR 75888-01, 75889

1 if its sports-based event contracts do not qualify as excluded commodities, then the special rule
2 in 7 U.S.C. § 7a-2(c)(5)(C) does not work with respect to contracts involving gaming. But a
3 contract on whether the World Series of Poker will occur this year would be such a contract.
4 The World Series of Poker has inherent financial consequences because the host (Caesars
5 Entertainment) charges entrance fees to participants. And it involves gaming.

6 Further, even if Kalshi’s contracts are deemed excluded commodities, § 2(a) does not
7 state that the CFTC has exclusive jurisdiction over excluded commodities, which are defined
8 separately from commodities. Congress could have included excluded commodities in § 2(a) but
9 it did not. *See S.E.C. v. McCarthy*, 322 F.3d 650, 656 (9th Cir. 2003) (“Congress’s explicit
10 decision to use one word over another in drafting a statute is material.”). Given the subject
11 matter of excluded commodities, that distinction makes sense. The CFTC does not have
12 exclusive jurisdiction over interest or exchange rates, currencies, securities, or macroeconomic
13 indicators. Nor does it have exclusive jurisdiction over the subject matter in the special rule
14 related to excluded commodities, such as activity that is unlawful under federal or state law,
15 terrorism, assassination, war, or gaming. *See* 7 U.S.C. 7a-2(c)(5)(C).

16 Although an “excluded commodity” could be thought of as a subset of “commodity,”
17 substituting “excluded commodity” for “commodity” in § 2(a) does not grammatically or
18 logically make sense. Excluded commodities do not involve things that are “contracts of sale of
19 a commodity for future delivery.” 7 U.S.C. § 2(a). Interest rates, exchange rates, credit risks,
20 inflation indexes and measures, and other macroeconomic indexes or measures are not sold “for
21 future delivery.” Nor are occurrences, extents of occurrences, or contingencies that are beyond
22

23 (referring to excluded commodities as “primarily financial commodities but also commodities
such as weather”).

1 the control of the parties to the relevant contract and associated with a financial consequence
2 sold for “future delivery.” It is not logical to state that Kalshi is offering contracts of sale of a
3 sports event (or its outcome) for future delivery. Thus, Kalshi’s gaming contracts do not qualify
4 as “contracts of sale of commodities for future delivery” under § 2(a).

5 Ruling that the CFTC does not have exclusive jurisdiction over excluded commodities
6 under § 2(a) does not oust the CFTC from regulating excluded commodities. The CFTC would
7 still have jurisdiction over DCMs who list such agreements under § 7(d)(1), just not exclusive
8 jurisdiction under § 2(a). Thus, the Board has established that Kalshi is not likely to succeed in
9 showing that Kalshi’s contracts fall within the CFTC’s exclusive jurisdiction under § 2(a) even if
10 they are excluded commodities.

11 ***D. Kalshi has shown serious questions on the merits.***

12 Although I conclude Kalshi has not shown a likelihood of success, it has raised serious
13 questions on the merits. The issues in this and similar cases are complex, novel, and evolving.
14 Kalshi has raised serious questions about how to properly interpret the statutory language, to
15 divine congressional intent, and to resolve the tension between what constitutes state-regulated
16 gambling versus federally regulated derivatives. I therefore address the other factors regarding
17 whether to grant a TRO under the sliding scale approach of *Alliance for the Wild Rockies*.

18 **V. THE BALANCE OF HARDSHIPS DOES NOT TIP SHARPLY IN KALSHI’S FAVOR**
19 **AND THE PUBLIC INTEREST DOES NOT FAVOR AN INJUNCTION.**

20 Because Kalshi has shown serious questions on the merits, the Board must show that the
21 balance of hardships does not tip sharply in Kalshi’s favor. It also must show that the public
22 interest does not favor the injunction. The Board has met its burden on these factors.

1 Kalshi's concerns are essentially that it will not be able to profit from the trades, and that
2 it suffers some reputational harm if it cannot offer those contracts to Nevada residents or must
3 close out contracts involving Nevada residents. Kalshi also asserts that it risks its DCM
4 designation if it does not offer its products nationwide.

5 Kalshi's harms are largely monetary. Kalshi may not be able to recover damages from
6 the defendants if it turns out that it can offer these contracts without violating Nevada law, which
7 is a factor to consider in balancing the hardships. But Kalshi's monetary harm is weighed
8 against the State of Nevada's financial interests in tax revenues and Kalshi's competitors'¹¹
9 financial interests in fair competition.

10 Kalshi's monetary harm can be mitigated through geofencing, which regulated entities in
11 this jurisdiction employ. Although Kalshi contends that it risks losing its DCM designation if it
12 geofences, there is no evidence before me that the CFTC would take adverse action against
13 Kalshi for complying with court orders and state law while the various lawsuits play out. To the
14 contrary, it appears the CFTC would not act against registered entities in these circumstances.
15 For several months after the Board announced that it sent Kalshi a cease-and-desist letter,
16 Robinhood did not offer its Nevada customers the option of trading on Kalshi's exchange. *See*
17 *Robinhood*, ECF No. 8 at 3-4. There is no evidence that the CFTC threatened Robinhood's
18 status as a registered entity for doing so. And recently, Crypto reached an agreement with the
19 Board while the appeal in its case plays out. *See Crypto*, ECF No. 110. Although it is not clear
20 from the record what that agreement is, there is no evidence that the CFTC has acted or
21 threatened to act against Crypto for satisfying the Nevada regulators while that case is on appeal.
22 Additionally, I find it difficult to credit Kalshi's fear given its apparent willingness to risk its
23

¹¹ This includes Nevada-licensed entities and Crypto.

1 DCM status by listing contracts involving gaming (however one defines it) in the face of the
2 CFTC’s regulation that prohibits DCMs from doing so. *See* 17 C.F.R. § 40.11(a).

3 The CFTC has recently directed DCMs like Kalshi and FCMs like Robinhood to warn
4 customers about the various lawsuits and risks they pose. CFTC Letter No. 25-36 (Sept. 30,
5 2025). As a result, Kalshi’s customers are on notice that offering gaming contracts implicates
6 the CFTC’s regulation, that the legal landscape under which Kalshi is operating could change,
7 and that customers’ contracts could be disrupted. If customers continue trading in Kalshi’s
8 products, they, like Kalshi, are proceeding at their own risk. Kalshi could have proceeded
9 cautiously until this and other lawsuits played out, but instead it greatly expanded its offerings,
10 so it has to some extent created or amplified its own harm.

11 Balanced against Kalshi’s harms are substantial irreparable harms to the Board, the State
12 of Nevada, the gaming industry in this state, and the public interest. First, the Nevada
13 Legislature made findings, and it is self-evident to anyone who lives in Nevada, that the “gaming
14 industry is vitally important to the economy of the State and the general welfare of the
15 inhabitants.” Nev. Rev. Stat. (NRS) § 463.0129(a). The Nevada Legislature also found that a
16 “comprehensive regulatory structure, coupled with strict licensing standards, will ensure the
17 protection of consumers, including minors” and problem gamblers. NRS § 463.745. The Nevada
18 Legislature also found that the success of legal gaming is dependent on public confidence and
19 trust, and that public trust can be maintained only through strict regulation of those involved in
20 the gaming industry in this state. NRS §§ 463.0129(b), (c).

21 The defendants thus have strong interests in regulating gaming in Nevada. Indeed, they
22 are statutorily charged with doing so under Nevada law. The defendants and the public have an
23 interest in prohibiting gaming in Nevada that is not subject to the same rigorous regulations and

oversight as the licensed entities in this state, including gaming involving individuals who are under the age of 21 or problem gamblers. Whatever one's views are on gambling, there is no question that some segment of the population will suffer from problem gambling, but neither DCMs nor the CFTC is equipped to address those issues the same way state gaming regulators and licensed entities are.¹² The CFTC admits it is not a gaming regulator. *See supra* n.6. Allowing Kalshi to continue offering sports-related event contracts to 18-year-olds, even though the CFTC issued a regulation that prohibits DCMs like Kalshi from listing gaming contracts, is not in the public interest. *See* 17 C.F.R. § 40.11(a).¹³

I must also consider, as part of the public interest, the interests of the gaming industry in this state. Licensed gaming companies have invested millions of dollars to comply with state regulations only to supposedly find out that they could have just become CFTC-registered

¹² *See* NRS § 463.350(1)(a) (prohibiting gambling for persons under 21 years old); NRS § 463.151(2) (State maintains a list of persons who may not participate in gambling); Nev. Gaming Control Reg. 5.17(2) (requiring licensees to post “written materials concerning the nature and symptoms of problem gambling” and toll-free number for the National Council on Problem Gambling or a similar Board-approved entity); *id.* 5.17(4) requiring licensees to implement a program to allow patrons to self-limit access to credit, check cashing, or direct mail marketing of gaming opportunities by that licensee).

¹³ Kalshi argues that § 40.11(a) does not categorically prohibit gaming-related contracts because under § 40.11(c), the CFTC can do a case-by-case review of self-certified contracts. *See* ECF No. 184 at 16. But § 40.11(a) states in unambiguous language that a “registered entity shall not list for trading or accept for clearing on or through the registered entity . . . [a]n agreement, contract, transaction, or swap based upon an excluded commodity, as defined in Section 1a(19)(iv) of the Act, that involves, relates to, or references terrorism, assassination, war, gaming, or an activity that is unlawful under any State or Federal law” or an agreement, contract, transaction, or swap based on an excluded commodity that “involves, relates to, or references an activity that is similar to” the enumerated activities. Section 40.11(c) reflects the practical reality that if a DCM nevertheless lists a contract that involves an enumerated activity or something similar to an enumerated activity, the CFTC may review it. The idea that the CFTC could not categorically prohibit contracts on things like terrorism or assassination and instead must review each and every contract individually is dubious, particularly where a DCM who believes their contract is not contrary to the public interest can seek pre-approval from the CFTC. *See* 17 C.F.R. § 40.3(a).

1 exchanges to offer sports gambling nationwide for anyone over the age of 18 without complying
2 with Nevada’s gaming regulatory regime or paying taxes in this state. If Kalshi’s view is
3 adopted, there is a not-insignificant chance that the regulated entities in this state will abandon
4 their current model and become DCMs, unleashing even more unregulated gambling and
5 devastating the Nevada economy and related tax revenues. Indeed, recently, two of the “largest
6 sports betting operators in the U.S., FanDuel and DraftKings, agreed . . . to not seek licensing in
7 Nevada in order to focus efforts on launching prediction markets in other states.” *DraftKings,*
8 *FanDuel Agree to Abandon Nevada in Favor of Prediction Markets*, The Nevada Independent,
9 Nov. 12, 2025, available at [https://thenevadaindependent.com/article/draftkings-fanduel-agree-](https://thenevadaindependent.com/article/draftkings-fanduel-agree-to-abandon-nevada-in-favor-of-prediction-markets)
10 [to-abandon-nevada-in-favor-of-prediction-markets](https://thenevadaindependent.com/article/draftkings-fanduel-agree-to-abandon-nevada-in-favor-of-prediction-markets).¹⁴

11 The traditional police powers of the states, which are considerable and longstanding,
12 particularly in this state which has led the nation in gaming regulation and enforcement for
13 decades, weigh heavily against Kalshi’s harms. As I mentioned in my *Crypto* order, had
14 Congress intended to upset the balance between state and federal gaming regulation and turn
15 CFTC-designated markets into nationwide casinos for anyone over the age of 18 with no
16 comparable federal regulator, it surely would have made that intent more explicit.

17 I therefore find that the balance of hardships does not tip sharply in Kalshi’s favor.
18 Rather, the balance of hardships and the public interest weigh in favor of the defendants and of
19 dissolving the preliminary injunction.

20 VI. CONCLUSION

21
22 ¹⁴ As mentioned previously, I can consider hearsay in deciding whether to issue a preliminary
23 injunction. Additionally, the Board confirmed at the November 14, 2025 hearing that FanDuel
and DraftKings have voluntarily abandoned their Nevada licensing applications. ECF No. 219 at
89.

1 I THEREFORE ORDER that the defendants' motion to dissolve the preliminary
2 injunction (**ECF No. 142**) is **GRANTED**. The preliminary injunction at ECF No. 45 is
3 dissolved and no longer in force or effect.

4 DATED this 24th day of November, 2025.
